

IT'S EASY TO

STAY SECURE

security software

Install antivirus and anti spyware software. Update them and the operating system regularly.

wireless security

Know your network. Identity thieves prey on public and unprotected Wi-Fi networks.

firewalls

A firewall is your computer's first line of defense. Ensure you enable it.

phishing

Don't be a phishing scam victim. Reputable organizations will never ask for personal data, account numbers, or passwords via email.

copyright

Get the facts on sharing and downloading music online. It's your job to ensure you're downloading and sharing legally.

Passphrase:

.....

passphrases

Choose strong passphrases, change them regularly, and **NEVER** share them with **ANYONE**.

be safe with your computer

- lock your computer when walking away
- always remember to log out when finished
- never leave your laptop unattended, even for a minute
- follow these and other guidelines for staying safe online
